studIT PCs for students

studIT provides around 300 computers for students at different locations on campus. You can log on to those PCs with your student account. The majority of those computers are Linux-based systems. Still, you'll be able to work in a desktop environment just as you are used to on Windows machines. All computers at the different LRCs are native Windows-based PCs.

You'll find all information needed to use those PCs below:

- andere
- bibliotheken
- kwz
- linuxrechner
- med
- start
- standorte
- start
- sub
