

studIT support

For us studIT support means to advise students and all other users on our services.

What is studIT?

In 1996 studIT was founded by highly motivated students. Their goal was to enable all students to  access the Internet at any time. The Internet Hotline by students for students was founded in 1998. Since April 2008 the Internet Hotline has been financed by tuition fees. At the same time the service features were extended, therefore it was time for a new name which displayed the bond with the students. That is why the Internet Hotline was renamed to **studIT** in October 2008. studIT provides services for students aiming to facilitate their everyday life at Göttingen university.

Our services

- provision of Linux and Windows based computers (client-based)
